HalfTime[®] Owner's Instructions

Thank you for choosing the HalfTime. We are confident that you will appreciate your recordings more as time passes, and discover the many benefits of the advanced technology incorporated into the HalfTime.

UNPACKING

Before unpacking your new HalfTimes, please note that they should be handled carefully. Touching the moving elements could damage them.

After unpacking your HalfTimes, **save the boxes and all packing materials**. At this time you should fill out all the information on the warranty card, including serial numbers and the date of purchase. Mail the card to us and we will validate your warranty.

PLACEMENT AND CARE OF THE HALFTIMES

The HalfTime is a flexible loudspeaker designed to provide optimum performance in a wide range of listening situations. These speakers are particularly effective when coupled with our FullTime[®] bass system. The HalfTimes (with or without the FullTime) may be placed on the wall, on shelves, on speaker stands (the FullTime makes a great speaker stand)—nearly anywhere.

We recommend any high-grade furniture polish. Do *not* place the HalfTimes near radiators or any other heat sources such as direct sunlight, which may bleach the wood and fade the grilles.

WHAT TO DO IF YOU NEED SERVICE

DCM loudspeakers have a history of extremely high reliability. However, should they require service, contact your dealer. If your dealer is at an inconvenient distance, please contact DCM Corporation directly.
