Dimensions:	38 x 14 3/4 x 7 3/4 inches HxWxD
Weight:	38 pounds each

## TF-400 Owner's Instructions

Thank you for choosing the TF400 Co-axial loudspeaker system. We are confident that you will appreciate your recordings more as time passes, and discover the many benefits of the advanced technology incorporated into the TF400.

### UNPACKING

Each shipping carton contains one TF400 speaker and a warranty card. After carefully unpacking your TF400's, please save the boxes and the packing materials for possible use later. If either speaker appears to be damaged, please do not attempt to connect them. Repack both speakers in their original cartons and notify your DCM dealer.

### MAINTENANCE

The solid oak tops and bottoms of your TF400 loudspeakers can be cleaned with a high grade furniture polish. Dust may be wiped from the grille cloth with a piece of felt, or carefully vacuumed if necessary. Do not place the speakers near radiators or other heat source, such as direct sunlight, since these may fade colors over time.
